

IT environments are constantly changing to keep pace with the evolution of technology. Promark Professional Services believes that both customer satisfaction and business opportunities are maximized by utilizing a structured, methodical approach.

## Benefits:

- 🔗 100% Channel Focused
- 🔗 Increased revenue and margin opportunities
- 🔗 Certified Systems Engineers - an extension of your team
- 🔗 Increased customer awareness and knowledge (IQ)
- 🔗 Rapid engagement and implementation deployment
- 🔗 Simplified pricing model

*"I used Promark Professional Services for an HP LeftHand SAN/Server Virtualization installation. The Promark team was able to offer VMware and SAN customization, data migration, training, replication setup, etc. Of all the services I have sold, this was one that left me **stress-free and full of confidence**. I had **zero problems**, was left with a **satisfied customer**, and made some money! I will **definitely engage Promark again** moving forward." **Mike Zorica - Promark VAR***

### Application Integration

Applying vendor "Best Practices" for application integration with SAN storage solutions. Optimizing existing application environments to leverage new storage technologies. Capabilities include: Active Directory Integration and Server/Storage Virtualization

### Network Optimization

Identify, analyze, and recommend network optimizations to improve storage and server virtualization usage. Implement small, medium, and large scale network changes to further enhance server and SAN performance.

### Storage Implementations

Install and configure many popular SAN technologies. Plan, implement and support the full implementation. Extensive knowledge transfer and training provided as part of the implementation.

### Backup and Recovery

Design the right solution using the right products and solutions required to meet business objectives. Analyze current backup infrastructure, evaluate business goals, and recommend the right solution. Full implementation support for recommended solutions, including post-implementation support.

### Disaster Recovery

Assist with planning and architecting the right solution based on the business objectives and key metrics like RPO and RTO. Evaluate current disaster recovery strategy for all key systems recommend optimizations and changes. Implement all recommended changes and optimizations.

### Infrastructure Virtualization

Whether its applications, servers, storage, network, or desktops, Promark has capabilities to integrate all of these architectural building blocks to virtualize your resources. With Promark, you can leverage the benefits of virtualization and keep your applications secure, fast, and available in the most operationally efficient manner.
