TRUE VISIBILITY SUITE FOR NEW RELIC

Make the best APM even better with this suite of agentless plugins

As new, more distributed applications have become the norm, the IT stack has fundamentally changed in order to support them. New Relic users like you are often ahead of the curve in cloud adoption, but even cloud-first organizations often rely on a mix of on- and off-premises resources. The Blue Medora True Visibility Suite extends New Relic capabilities to your entire heterogeneous IT stack.

The True Visibility Suite includes dozens of New Relic Insights-enabled plugins which aggregate individual resource data from the leading server, storage, compute and database applications. This jointly-engineered solution gives you end-to-end visibility into your applications and their dependencies, regardless of where they reside.

See What You Need, Where You Want

Make New Relic your centralized-IT operations monitoring platform. By adding the True Visibility Suite, you'll get all the critical details about your IT infrastructure inside New Relic you can:

- Reduce cross-team friction by eliminating MTTI hunts through, siloed infrastructure tools.
- Increase application availability by pinpointing problems faster and more accurately with dependency-aware dashboards.
- Clear up alert storms with built-in policies that disable alerts for your dev environment and other less-critical resources.
- Drill down with native-tool detail using subviews to find noisy neighbors, bandwidth vampires and bad queries impacting app performance.

Turn Data Into Decisions

Make better, data-driven decisions about your IT environment using the Blue Medora True Visibility Suite to add thousands of data points to New Relic Insights. With real-time, comprehensive data and analytics on your entire IT environment you can:

- Proactively resolve potential issues that may impact end-users before they spread to the rest of your stack.
- Take action immediately with intelligent recommendations that accurately address the root cause.
- Increase cross-team collaboration with 2-click reporting that makes it easier to share optimization strategies across your organization.
- Give your Dev/Ops fast feedback on how new applications and patches perform in production.
- Accurately predict future resource purchases with a full understandings of usage patterns and geographical trends.

Deploy with confidence

The True Visibility Suite was co-developed by Blue Medora and New Relic, giving it several advantages over other solutions the market.

BETTER VISIBILITY BOOSTS IT OPERATIONS

- 2.6X low error rates on IT services
- 2.2X more likely to have high availability
- 40% more likely to have proactive problem detection
- 3X more likely to resolve issues faster
